Knuffi®

Warning and Protective Bumper Guards

INFINITE SAFETY

WARNING AND PROTECTIVE BUMPER GUARDS

The **Knuffi**® warning and protective bumper guards are made of polyurethane foam with elastic properties so that they can absorb even heavy impacts while simultaneously providing a warning at hazardous places, such as edges, gaps and obstacles by means of black and yellow hazard markings.

The **Knuffi**® profiles can be used to mark transport routes within a company's premises, on machinery and vehicles or on walls and thoroughfares both indoors and outdoors.
